

Range of Sea-Level Rise Projections for the California Coast^a

^a Estimates represent the range between "likely" scenarios with a 66 percent chance of occurring and scenarios with a 1-in-200 chance of occurring. Range does not include estimates associated with "extreme" scenarios incorporating the effects of potential ice loss from the West Antarctic Ice Sheet, which are significantly higher.

From the *State of California Sea-Level Rise Guidance Document* published by the California Natural Resources Agency and the California Ocean Protection Council.
